

Programming Apps for the iPhone

Graeme Summers

Programming Apps for the iPhone® provides a comprehensive course of instruction in Xcode and Objective-C. The book does not assume any prior knowledge in programming and guides the user from the very simplest applications through to those with considerable complexity.

Students will find the book fun, interesting and challenging. Teachers will find it well structured, broad in its application and thorough in its topic coverage.

Programming Apps for the iPhone is an excellent textbook for programming courses and an invaluable teacher reference manual. It has been developed specifically for the Australian Years 10-12 classroom and is ideally suited to all Information Technology courses.

In addition the text has support material on the NelsonNet website:

- Images required for the programming examples and tasks.
- Fully developed programming examples from the book
- Solutions to all programming tasks.

COMPONENTS

SB + NN

See back of flyer for more information

TABLE OF CONTENTS

Section 1	Problems and algorithms
Section 2	Xcode fundamentals
Section 3	Variables and data types
Section 4	Branching
Section 5	Loops
Section 6	Arrays
Section 7	Touches, gestures and flips

Answers to 'Check what have you learnt' questions

IMPORTANT INFORMATION

Access to NelsonNet and NelsonNetBook is free to teachers who use the accompanying student book as a core educational resource in their classroom.

For further information about access codes and school codes for NelsonNetBooks, contact your sales representative.

ABOUT THE AUTHOR

Graeme Summers has been a teacher of Information Processing and Technology (IPT) in Queensland for 20 years. He was honoured with the prestigious QSITE Teacher Award for Leadership in Educational Computing (Queensland Society for Information Technology in Education). Graeme has authored IT textbooks for high schools across Australia, specialising in programming, and database design and development. He has been actively involved in computer education and software development in Australia since 1980.
